Additional information

We will suspend three parking bays on Gloucester Avenue next to Fitzroy Bridge. This is to make space for materials to be delivered and to park vehicles needed during these works.

We'll assemble and install a pontoon into the canal. This will be used as a working platform.

We'll install prisms on to the bridges to monitor for any movement before, during and after our tunnel boring machines pass below this area. The prisms will stay in place for at least a year after tunnelling has completed in the area, before being removed.

We may need to remove some vegetation around the prisms to keep a clear line of vision for monitoring. We will return at regular intervals to keep the vegetation clear, and to carry out monitoring. Monitoring will range from monthly to as often as daily while tunnelling is taking place close by.

Where we will be working

We'll be working on Fitzroy Bridge and the rail bridge over the Regent's Canal, close to Gloucester Avenue. The two bridges and the parking bay suspensions are shown on the map below.
