

In your area

Pinxton to Newton and Huthwaite | LA08

High Speed Two (HS2) is the Government's planned new high speed railway. High Speed Two Limited is the company responsible for developing and promoting the UK's new high speed rail network. In July 2017, the Government confirmed the route for the next phase of HS2: Crewe – Manchester and West Midlands – Leeds (Phase 2b).

Introduction

This information has been produced by HS2 Ltd to update you about the route from Pinxton to Newton and Huthwaite. It includes:

- a summary of the proposed route in your area and how the design has developed since July 2017;
- what we are currently working on and what we will be consulting on later in the year;
- the benefits that HS2 will bring to your area;
- how to find out more about the project; and
- how to get in touch with us.

The route of the proposed scheme from Pinxton to Newton and Huthwaite

The Pinxton to Newton and Huthwaite community area covers approximately 7.7km of the proposed route of the main line and Sheffield spur passing through the parishes of Pinxton, South Normanton and Blackwell. The area falls within the local authority areas of Ashfield District Council and Bolsover District Council as well as Nottinghamshire County Council and Derbyshire County Council. Pinxton parish forms the southern boundary of this section. The boundary between Blackwell and Tibshelf parishes forms the northern boundary of this section for both the proposed scheme main line and Sheffield spur.

In the Pinxton to Newton and Huthwaite community area, the proposed scheme has two main components:

- the HS2 main line: the route which continues from the northern boundary of the Hucknall area towards the Bolsover area; and
- the Sheffield spur: the route would split from the HS2 main line at South Normanton, heading north-west towards the Tibshelf and Pilsley area.

The route of the proposed scheme in this area includes the following main features:

- cuttings for a total length of approximately 2.9km;
- embankments for a total length of approximately 4km;
- viaducts for a total length of approximately 0.4km; and
- tunnel for a total length of approximately 0.4km.

Design development

Since the community information events in September 2017, we have continued to develop our design for the railway, which will be included in the working draft Environmental Statement that you will have an opportunity to give feedback on later this year.

We have also produced detailed maps showing the evolving design that includes construction compounds, road realignments and public rights of way. These show our work in progress and are likely to be refined or changed before we publish them as part of a consultation later in the year. To view the maps, please visit www.hs2.org.uk/building-hs2/building-the-line/phase-2b/mid-2018-information-events.

The crossing under the A38 and the dive under structure for the Sheffield spur have been modified in order to reduce land take and simplify construction.

An autotransformer station, which is a piece of infrastructure needed to power the railway, is proposed for a site near Silverhill Trail.

Bringing the benefits of HS2 to the Midlands and the North will play a critical role in rebalancing the national economy and provide the potential to create substantial opportunities to boost skills and create employment in the East Midlands region.

Councillor Jon Collins
Chair of the East Midlands Strategic Board

Independent research has shown that HS2 Phase 2 will create about 74,000 jobs during and post-construction and be worth about £4bn GVA to the East Midlands and South Yorkshire within ten years of services starting.

Scott Knowles
Chief Executive at East Midlands Chamber of Commerce

Environmental Impact Assessment

As part of the development of the Phase 2b proposed scheme, we are carrying out an Environmental Impact Assessment that will identify the likely significant effects of the construction and operation of the railway and the means to reduce or avoid such effects. This will be reported in our Environmental Statement, which will accompany the hybrid Bill that we expect to deposit in Parliament in late 2019.

For the purposes of reporting the findings of the Environmental Impact Assessment the Phase 2b route has been divided into 26 'community areas', of which Pinxton to Newton and Huthwaite is one (reference LA08). The working draft and formal Environmental Statement will have a detailed report for each community area. This will include an assessment of the local environment and likely significant effects of the proposed scheme, suggested methods of reducing or avoiding those effects, and the proposals for monitoring our impact during construction and operation.

As part of the Environmental Impact Assessment process, we are carrying out surveys to better understand the current local environment including noise conditions and ecology. We have also been engaging with local authorities, parish councils and other statutory bodies to collect information and local knowledge. More information about our survey work can be found online at: www.gov.uk/government/publications/a-guide-to-environmental-surveys-being-carried-out-by-hs2

Future consultations

Later in the year, we will consult on a working draft of the Environmental Statement. This will be an opportunity to see and comment on our work in progress. Parliament does not require us to consult on a draft of the document; however we believe it is important for communities and stakeholders to have a formal opportunity, to understand the progress of our work and provide feedback at this stage.

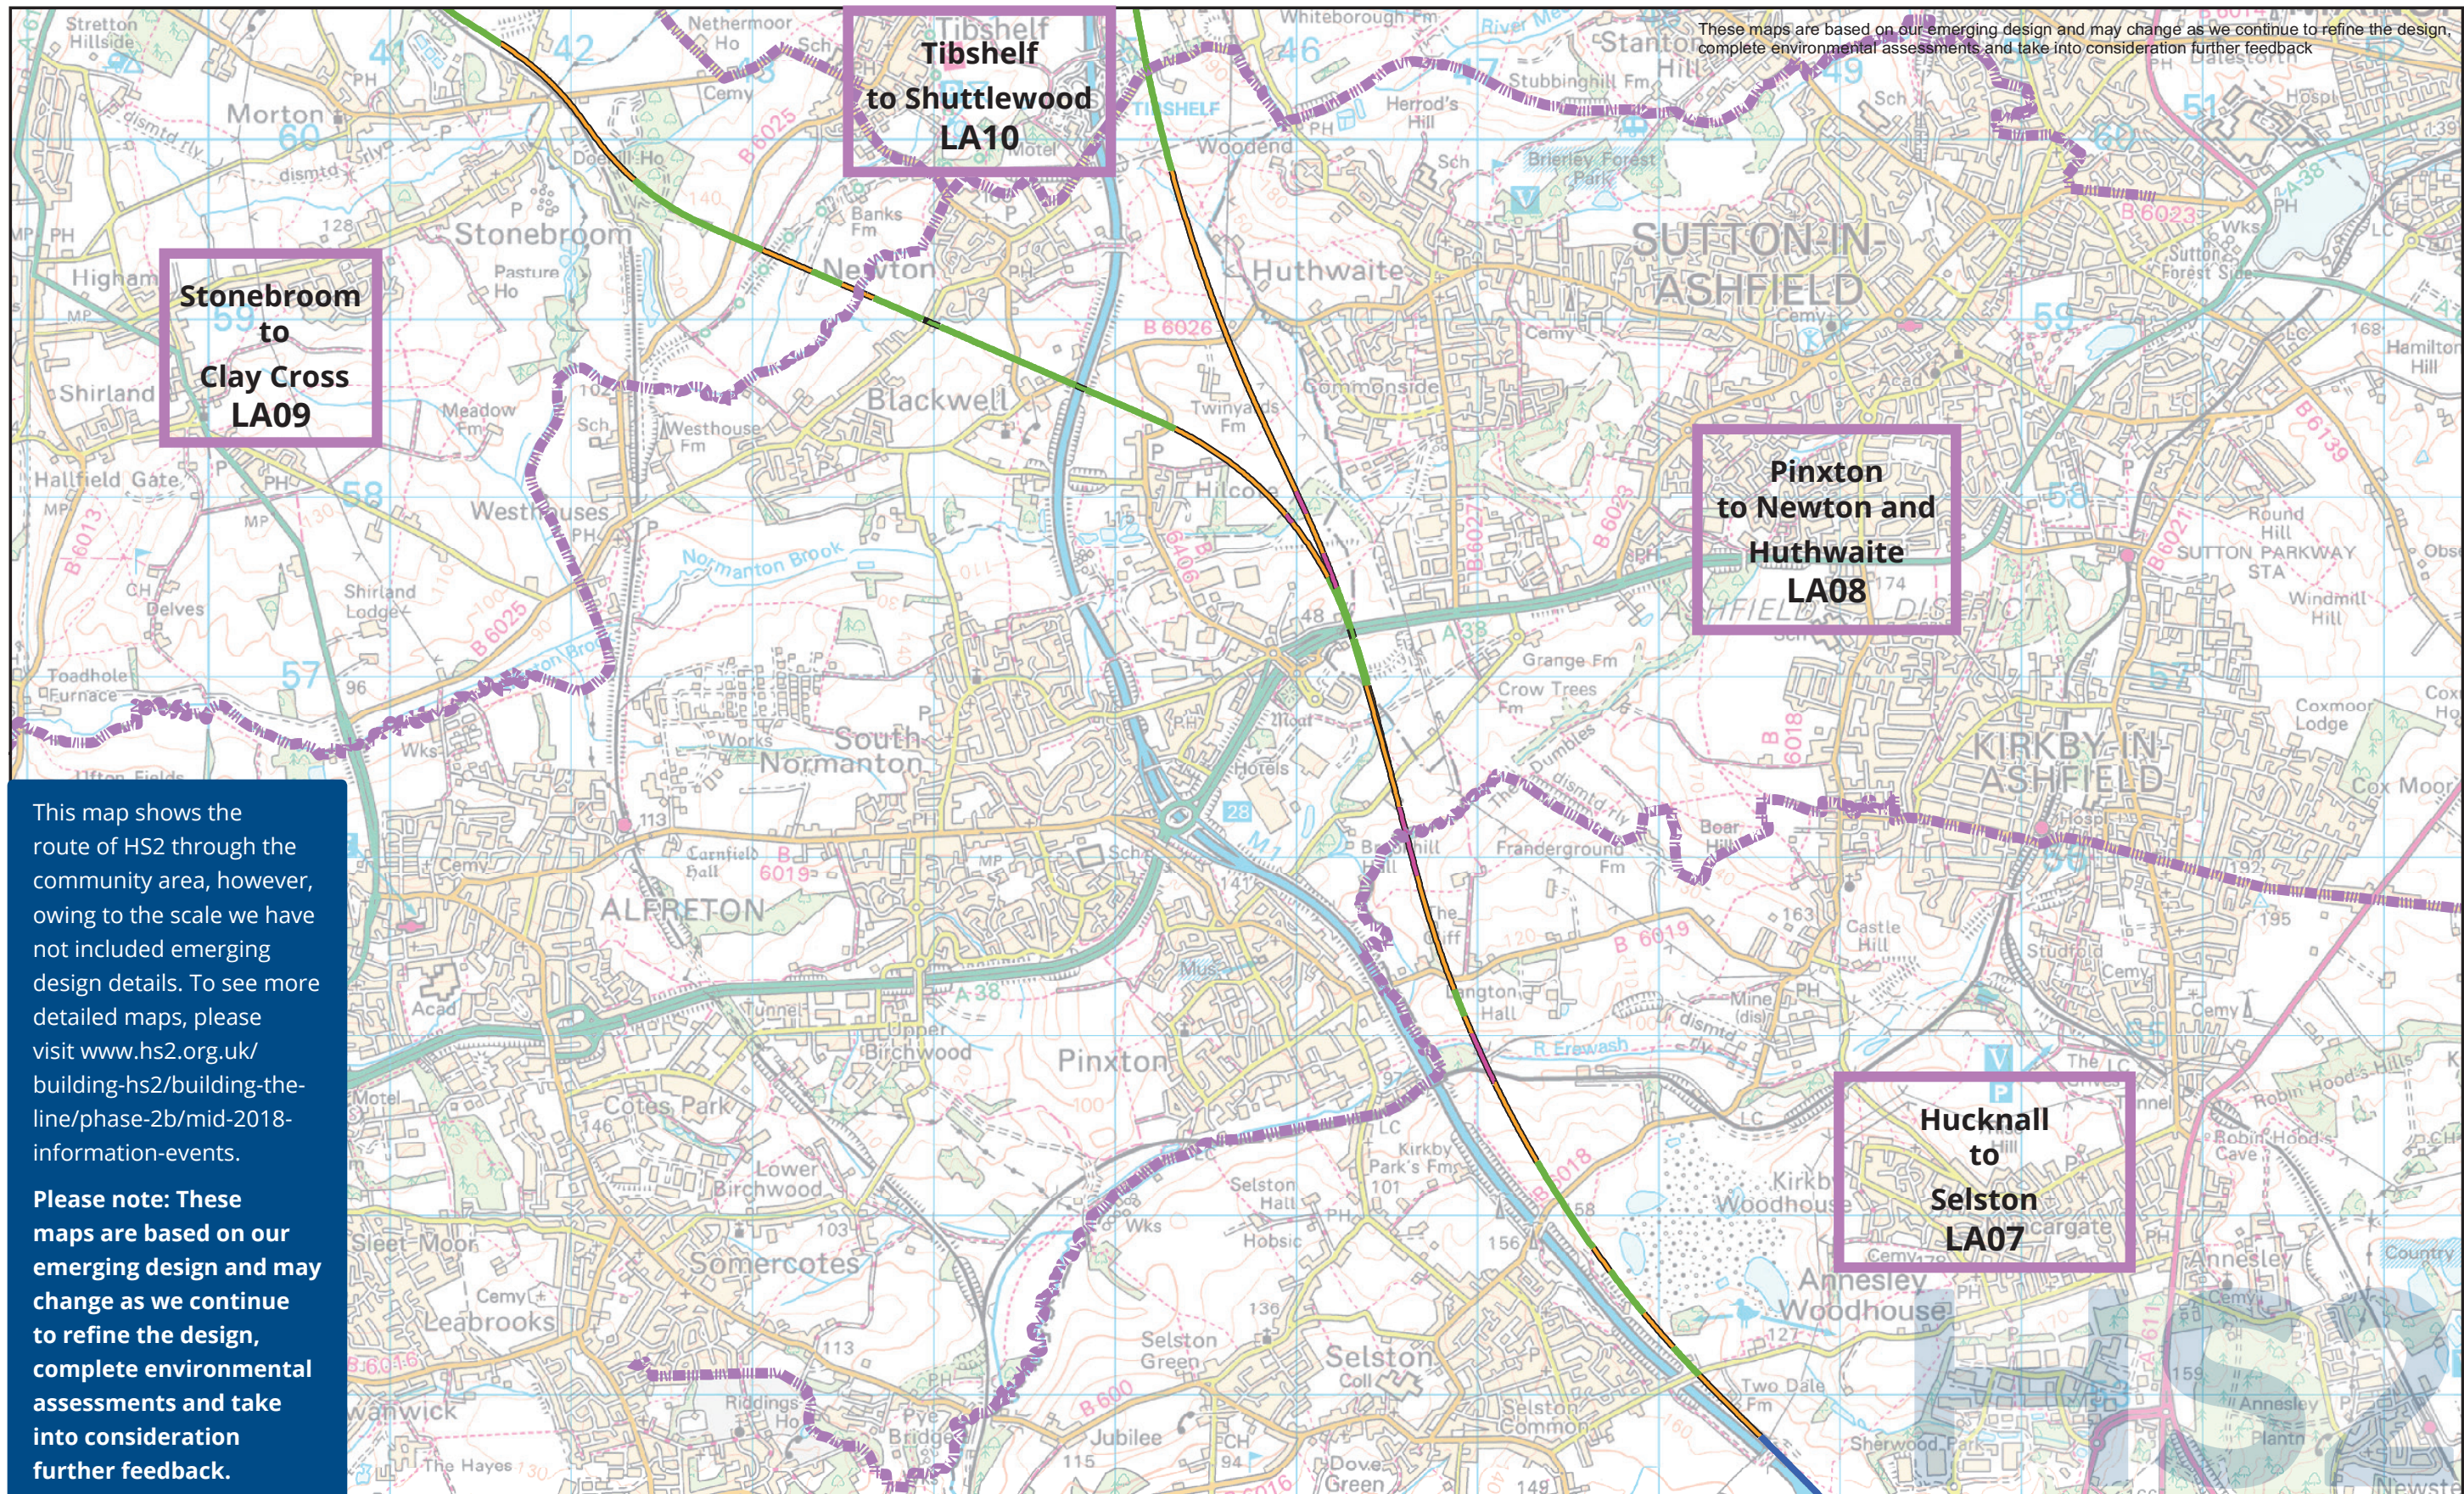

This will also be accompanied by the working draft Equality Impact Assessment, which identifies people with protected characteristics that may be disproportionately affected and any action that may be necessary to limit such effects. Feedback to these consultations will be considered in the development of the proposed scheme presented to Parliament.

National College for High Speed Rail

The newly opened National College for High Speed Rail will play a key role in generating the workforce of the future, designing and building the UK's new high speed rail network and future infrastructure projects including HS2. With state-of-the-art facilities in Birmingham and Doncaster, the college offers courses and apprenticeships in all elements of the rail industry whether leaving school, wanting to up-skill, or take a new career direction. HS2 alone is set to create 25,000 new jobs, including 2,000 apprenticeships, and careers in this industry are set to become more and more sought after.

If you would like further information, or to apply, visit the college website www.nchsr.ac.uk/ call the college on 0330 120 0375 or email on enquiries@nchsr.ac.uk

These maps are based on our emerging design and may change as we continue to refine the design, complete environmental assessments and take into consideration further feedback

This map shows the route of HS2 through the community area, however, owing to the scale we have not included emerging design details. To see more detailed maps, please visit www.hs2.org.uk/building-hs2/building-the-line/phase-2b/mid-2018-information-events.

Please note: These maps are based on our emerging design and may change as we continue to refine the design, complete environmental assessments and take into consideration further feedback.

The benefits of HS2 in your region

- HS2 will offer faster, more frequent and more reliable travel between cities and regions of the UK and will increase capacity on our congested railways. Journeys between the East Midlands and Birmingham will take just 20 minutes on HS2 services, bypassing congested roads and slow existing rail links.
- As it helps rebalance the economy, Britain's new high speed rail network is becoming integral to the East Midlands' plans to drive business growth, create jobs and secure investment, particularly with the regeneration opportunities provided by the new hub station at Toton.
- HS2 will allow businesses across the Midlands to collaborate with supply chains and research and development partners, draw on a deeper pool of skills, access new sources of finance and support networks, and secure new customers in regions across Britain.
- East Midlands Airport will be accessible to city regions from Newcastle to London via onward connections from the HS2 East Midlands Hub station. This will increase the catchment area of these airports, allowing the airports to provide more frequent flights and offer a wider choice of destinations for businesses based in the Midlands.
- Over 520 companies in the Midlands have already been awarded work on HS2, either directly or through its supply chain, and HS2 Ltd has engaged with more than 1,400 businesses in the Midlands on potential opportunities.
- 140 businesses from across the Midlands, 73% of which were small and medium-sized enterprises, met with HS2 Ltd's direct contractors at our largest supply chain engagement event to date in May 2018.
- HS2 will also provide fast, frequent and reliable services from the East and West Midlands to the HS2 station at Old Oak Common in West London, from where Heathrow Airport will be a short interchange away.
- HS2 will also offer graduates greater opportunities to build a career in the Midlands by providing fast, frequent and reliable access to job opportunities in a broader network of places without the need to relocate.

Factsheets

HS2 Ltd has published factsheets that explain how we intend to manage areas of concern and minimise impacts on the environment.

These factsheets can be found online at: www.hs2.org.uk/building-hs2/building-the-line/phase-2b/mid-2018-information-events

What is HS2?

HS2 is the largest infrastructure project in Europe and the most advanced railway ever built in the UK. It is a catalyst for growth – revitalising the country, creating new opportunities for jobs and skills, regenerating towns and cities, and bringing the nation closer together. It will increase capacity on our railways and improve connectivity between eight of Britain's ten biggest cities. It will run between London and Birmingham (Phase One) from 2026, extend to Crewe (Phase 2a) by 2027 and then link to Manchester, Leeds and further north from 2033 (Phase 2b). Once completed HS2 will travel to over 25 stations and serve 30 million people across Britain.

Why do we need HS2?

The future prosperity of the UK depends on a modern, strong and growing economy which enables us to compete on the international stage. Good rail links are essential for a strong economy, making it easier to import and export goods, for people to do business and to get to work.

HS2 will not only reduce journey times, it will provide more capacity for local, regional and freight services on the current network, relieving congestion and providing better travel options. By transforming journey times, HS2 will bring more opportunities within closer reach for employment, business, leisure and education.

What is the process for building HS2?

We have legal powers from Parliament to construct Phase One and must now gain approval to build the route from the West Midlands to Leeds and Manchester (Phase Two). On 17 July 2017 the Secretary of State for Transport confirmed the route for Phase 2b, and we are now preparing the documentation, known as the Phase 2b hybrid Bill, ready for submission to Parliament in 2019.

Submitting a hybrid Bill to Parliament is how the Government gains permission to build this nationally important infrastructure. As part of the Parliamentary process we will consult with the public on various aspects of the proposals. This is a real opportunity for communities to get involved and contribute to helping design the railway. In addition, people whose property or interests are specially and directly affected by the Bill can petition the Parliamentary committee considering the legislation, which can result in changes to the Bill.

Next steps

2017 – 2019

Carry out Environmental Impact Assessment

Late 2018

Consultation on the working draft Environmental Statement and working draft Equality Impact Assessment

2019

Deposit hybrid Bill for Phase 2b route and consult on final Environmental Statement and Equality Impact Assessment

2022

Gain Royal Assent for the Phase 2b hybrid Bill

2023

Start of construction period of Phase 2b

2033

Start of train services on the Phase 2b route

Keeping you informed

We are committed to keeping you informed and making sure that if you are affected by the Government's plans, you understand what to expect (and when), and how we can help.

Community engagement

We have a local engagement team which covers your area. If you would like to speak to them, please contact us using the contact details provided here. We have published a Community Engagement Strategy, which sets out our approach to community engagement and what it means for those who either live or work within the communities along the line of the new railway. You can read it by visiting:

www.gov.uk/government/publications/hs2-ltds-community-engagement-strategy

Residents' Charter and Commissioner

The Residents' Charter is our promise to communicate as clearly as we possibly can with people who live along or near the HS2 route. You can read it by visiting:

www.gov.uk/government/publications/hs2-residents-charter

We also have an independent Residents' Commissioner whose job is to make sure we keep to the promises we make in the Charter and to keep it under constant review. The Residents' Commissioner's reports are published at:

www.gov.uk/government/collections/hs2-ltd-residents-commissioner

You can contact the Commissioner at:
residentscommissioner@hs2.org.uk

Property and compensation

You can find our guide to property schemes by visiting:

www.gov.uk/government/collections/hs2-property

You can also find out if you are eligible for compensation at:

www.gov.uk/claim-compensation-if-affected-by-hs2

Contact us at HS2

If you have any questions about the information in this booklet, please get in touch. You can also contact us if you'd like a free copy of this booklet in: Large print | Braille | Audio | Easy Read or for help and information in a different language.
