

**Empowering communities** is the first ever contractor-led legacy strategy and vision. Working in partnership with HS2, it brings together the strengths of major construction companies Arup, Costain, Dragados, Mace, Skanska and STRABAG which are all like-minded businesses delivering the HS2 programme in London.

**Empowering communities** will deliver **long-lasting benefits for local people** for generations to come.

**HS2 will help Britain's post-pandemic economic recovery** and Empowering communities will ensure that communities along the route are **benefiting from the investment in HS2.**

Empowering communities is collaboratively led by the partner organisations and the community, enabling local people to have a say in what the programme delivers for their communities.

- Skills, employment and education initiatives
- Projects to tackle homelessness
- Equality diversity and inclusion
- Programmes to support young people
