HS2

# Upcoming works at the Westgate site

Information about works at the Westgate site from December 2020

# Location of our Westgate site

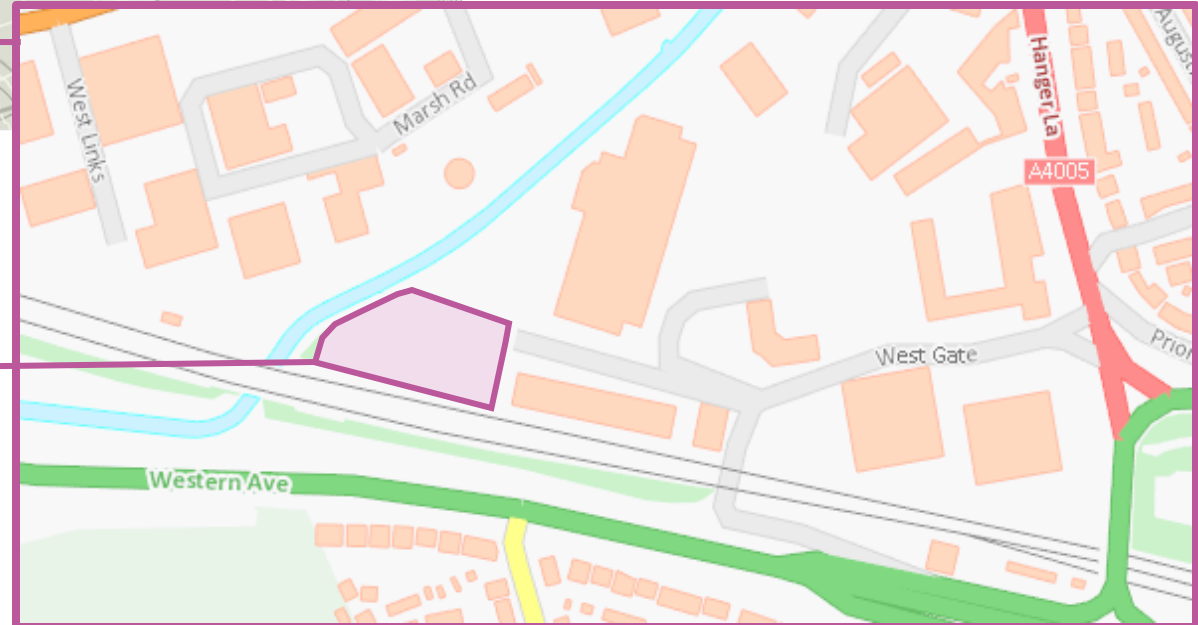

**Skanska Costain STRABAG Joint Venture (SCSJV)** is our Main Works Civils Contractor between Euston and West Ruislip (see map to left).

They are responsible for building the HS2 ventilation shafts, headhouses, tunnels and other structures in London. SCSJV are not building Euston or Old Oak Common stations.

## Where is our Westgate site?

The Westgate site will be located in the industrial area near the A40 and River Brent. From December 2020, we will be starting work at this site to get ready for construction of a ventilation shaft and headhouse.

# Works planned at Westgate site in 2020/2021

From December 2020, we'll start works to set up the Westgate site for future construction of a ventilation shaft and headhouse.

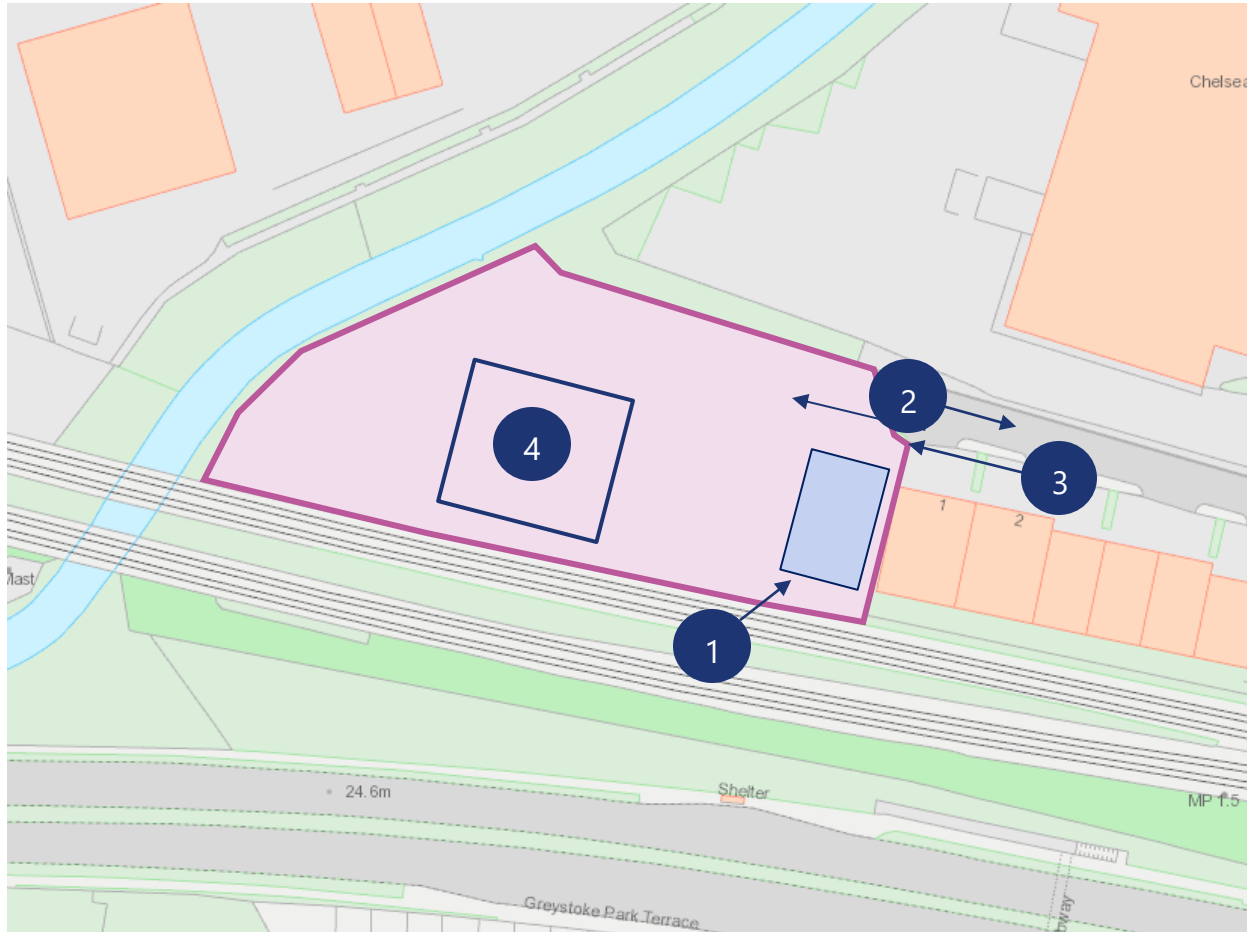

Works planned during winter 2020/2021 are shown in the table to the right. The dates for these works may change.

Works planned at Westgate site in 2020	Planned date for works*
Start construction works to set up site	Winter 2020
Onsite surveys and inspections	Winter 2020
Installation of worksite hoardings and gates	Winter 2020/early 2021
Clearance of vegetation within site boundary	Winter 2020/early 2021
Site clearance within site boundary	Winter 2020/early 2021
Installation of monitoring equipment	Winter 2020/early 2021
Preparation for piling works	During winter 2020
Utility works to protect utility services while we build HS2	Dates subject to confirmation
Piling works	Dates subject to confirmation

\*All planned dates for our works at this site remain subject to change. We will keep local residents and community updated about our works. For more information and to register for email updates, visit [www.hs2inkilburn-Northolt.co.uk](http://www.hs2inkilburn-Northolt.co.uk)

# Our site office and access points

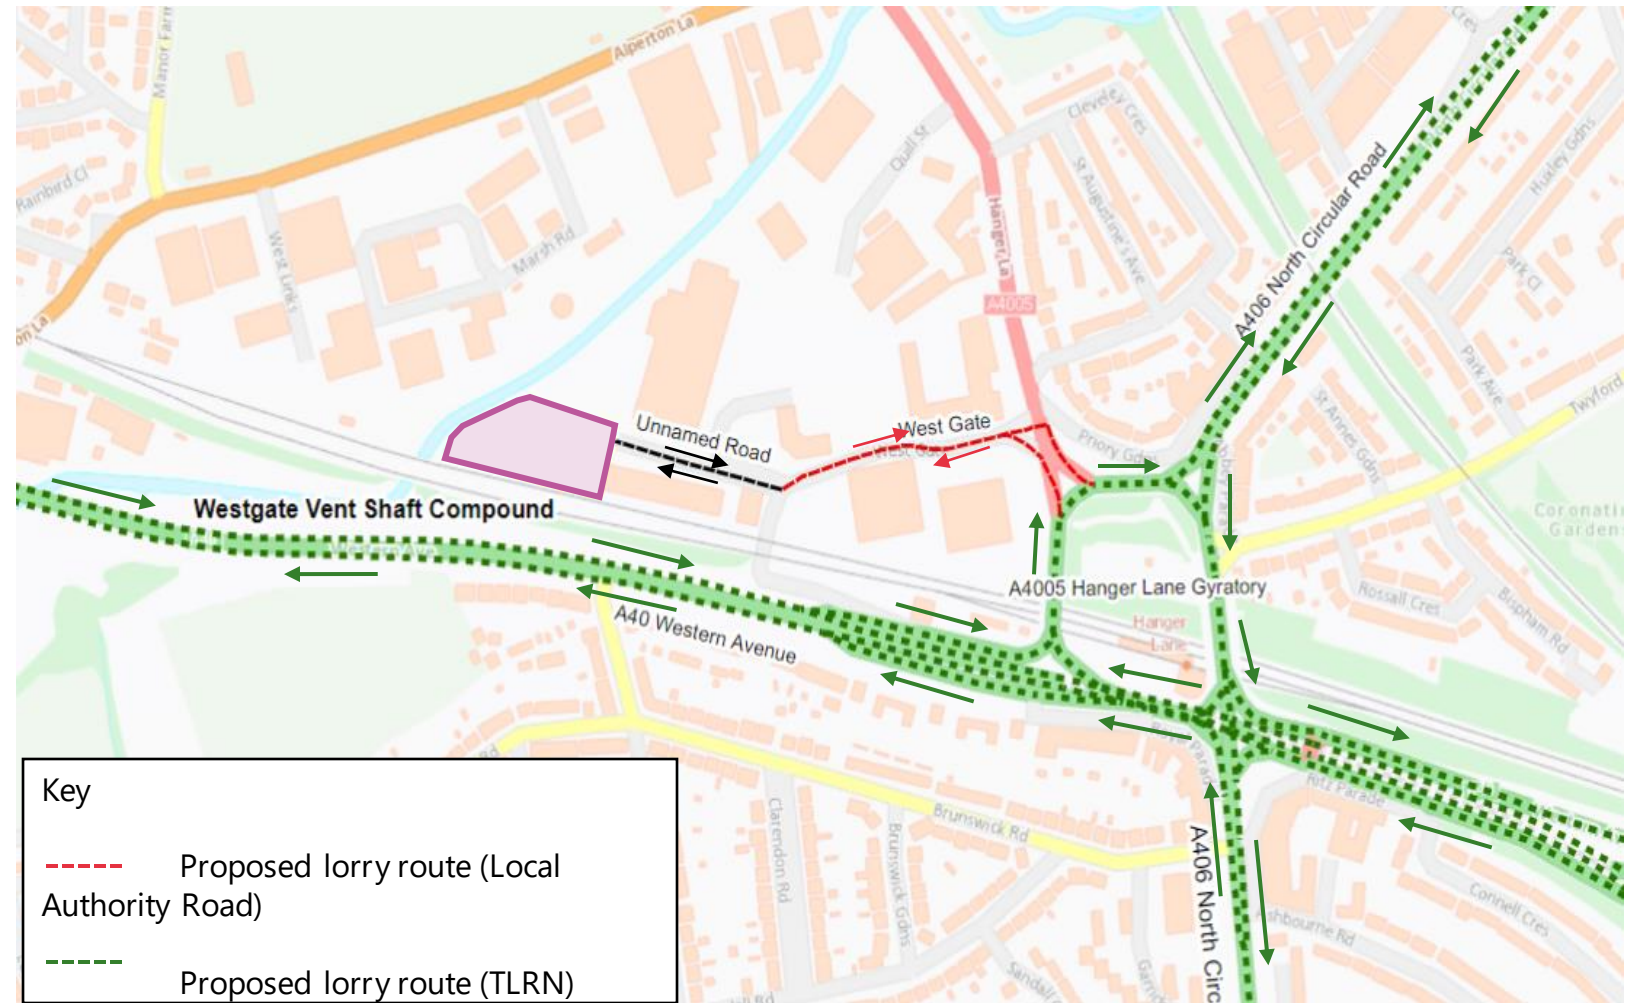

When we have set up our site, you will be able to see our site offices and welfare facilities from your workplace. You may also notice vehicles entering and exiting our site

-  Location of our worksite
-  1 Approximate location of our site offices and welfare facilities
-  2 Vehicle entrance and exit from site
-  3 Pedestrian entrance and exit (staff only)
-  4 Approximate location of future ventilation shaft and headhouse

# Map of lorry routes to and from Westgate site

The map to the right shows our planned lorry routes to and from the Westgate site.

# Future works to build a ventilation shaft and headhouse

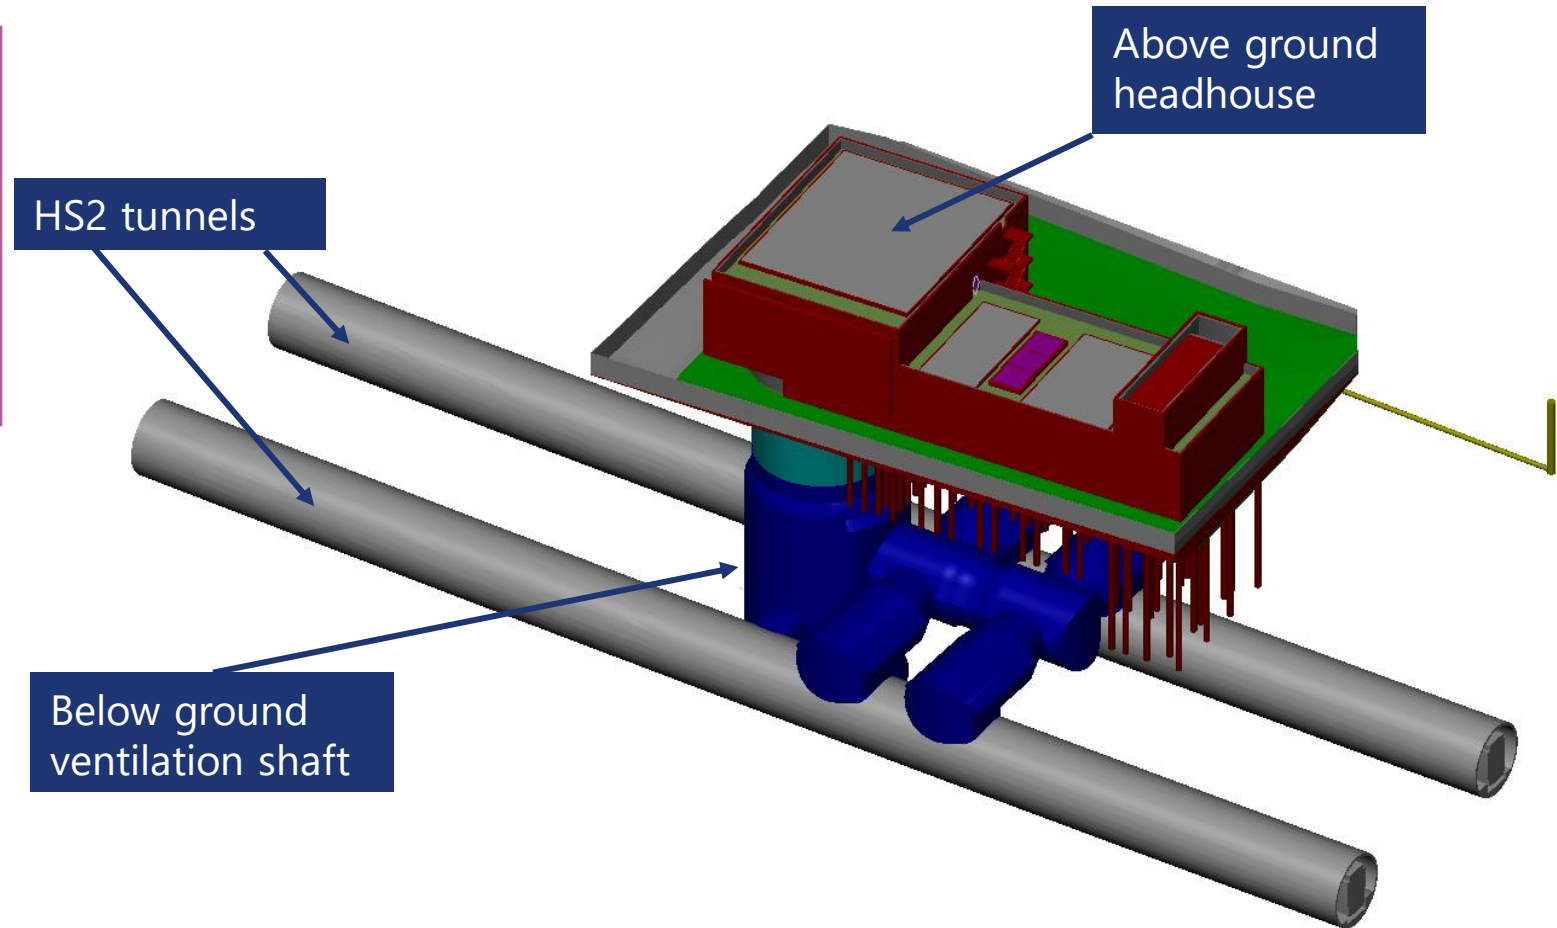

Ventilation shafts and head houses are an essential part of building a new railway.

These provide access to the tunnels for maintenance and emergency services, ventilation and electrical power supply.

## Future works

We plan to start building the Westgate ventilation shaft from Summer 2021 and the headhouse from Spring 2022.

The dates for these works may change. We'll provide more information and keep you informed at  
**[hs2inkilburn-northolt.co.uk](https://hs2inkilburn-northolt.co.uk)**

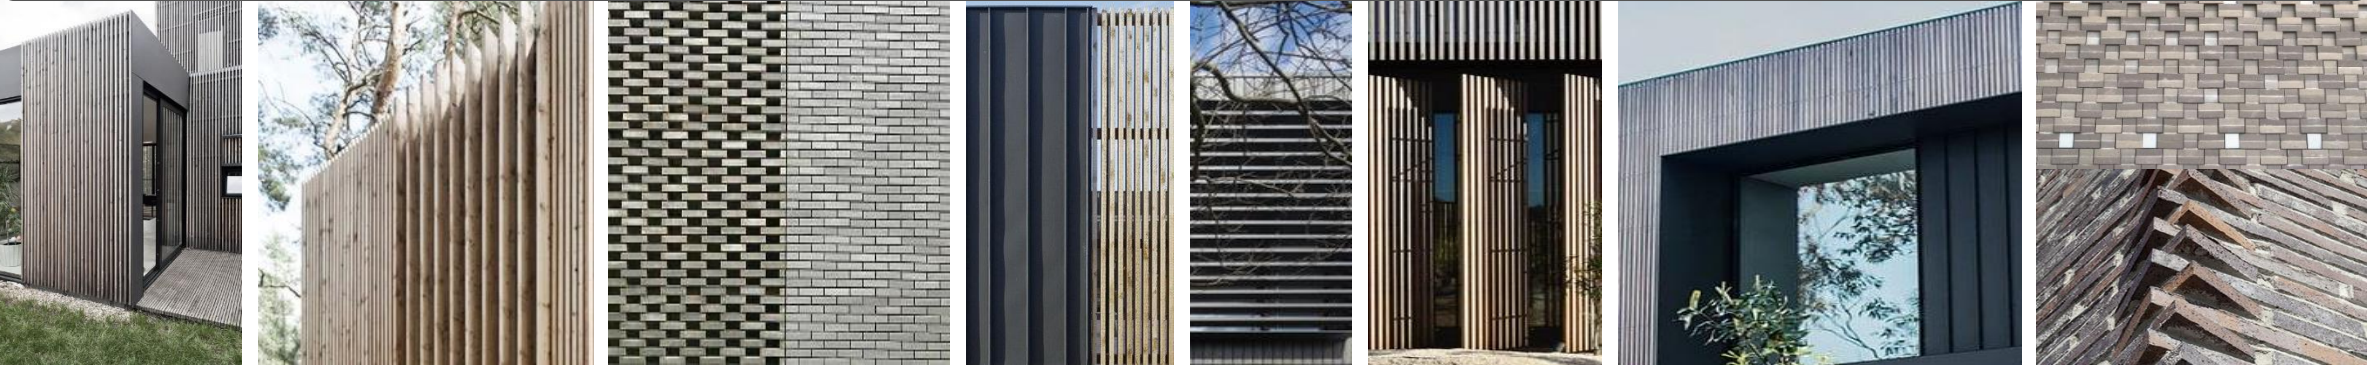

# Materials proposed for the headhouse

We're planning to use similar materials at all head houses between Euston and West Ruislip, but the combination of materials will vary depending on the local area.

Our current scheme design for the Westgate head house includes a combination of timber, metal, concrete and brickwork.

## Some examples of materials we could use

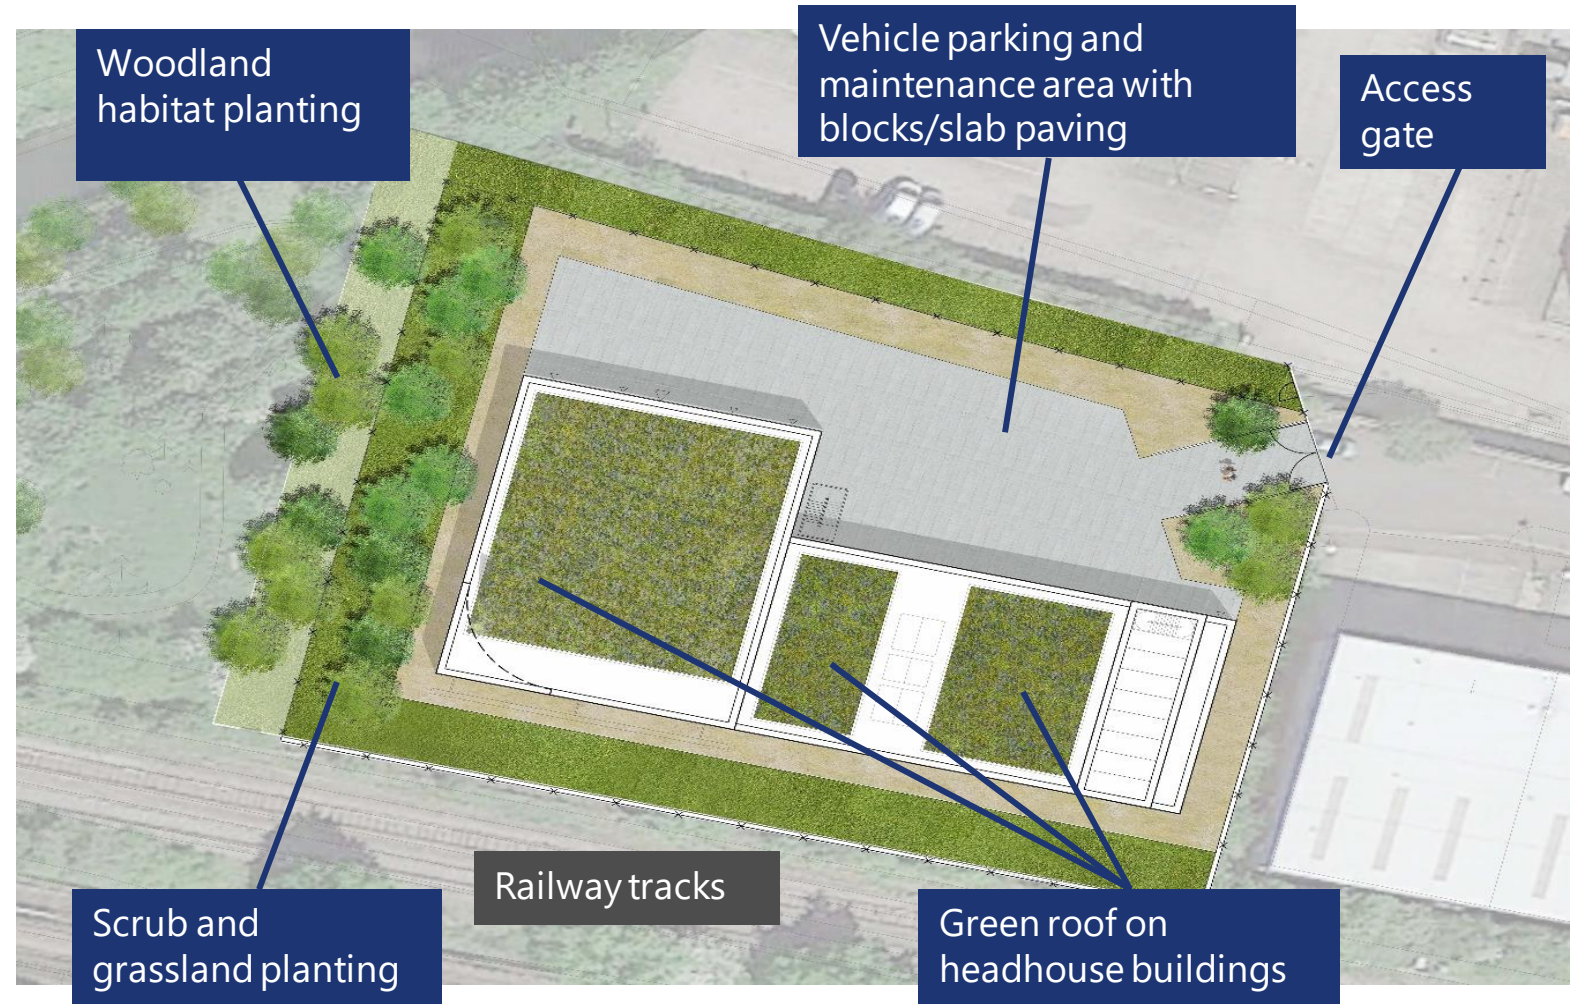

# Our future landscaping plans

When we have built the ventilation shaft and headhouse, we plan to landscape the site. We are planning to use a combination of materials including:

- Blocks/slab paving
- Woodland habitat planting
- Scrub habitat planting
- Grassland habitat planting
- Green roof on the headhouse

We'll keep our neighbours updated about our future landscaping design plans.

# We are committed to keeping you informed

We'll provide updates about our works [at hs2inkilburn-northolt.co.uk](https://www.hs2inkilburn-northolt.co.uk)
