

Update: traffic impacts on Park Village East – March to April 2021

Utility surveys on Park Village East - 29 to 30 March

In early March we carried out CCTV surveys of the utilities beneath Park Village East. Some of these surveys could not be completed due to blockages in the pipes. Those surveys that could not be completed, have been rescheduled for the 29 and 30 March. These surveys will require temporary parking bay suspensions, in the areas marked on the map below, to enable us to access the drains.

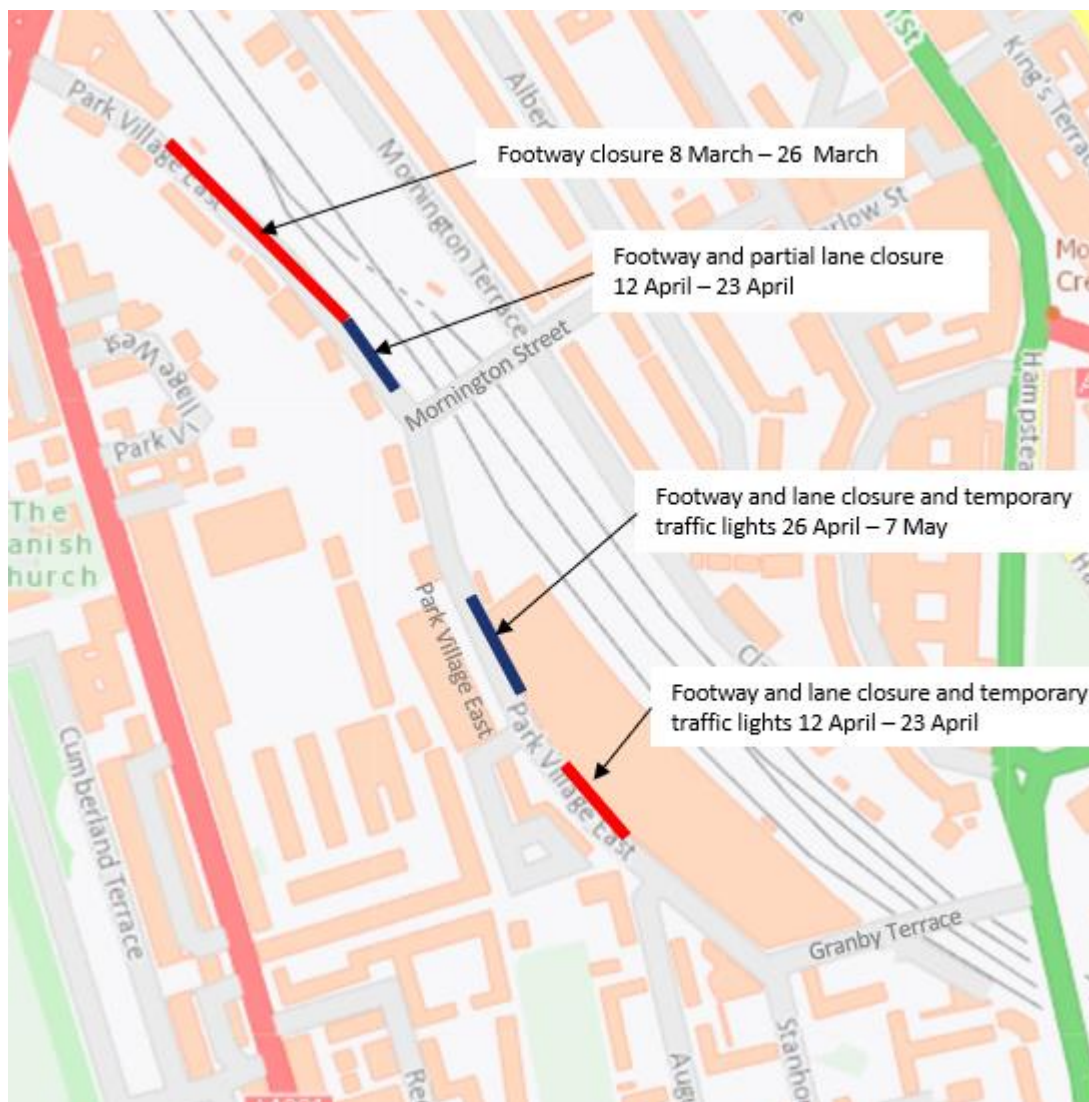

The CCTV surveys to be carried out on Mornington Terrace, Clarkson Row and Mornington Crescent on the 6 and 7 April have been postponed due to the UKPN works in the area. We will provide an update once the new dates are confirmed.

Installing ground monitoring equipment – 8 March to 7 May

We are currently installing ground water monitoring equipment within the footway and carriageway on Park Village East. This work, which is being carried out in stages, involves closures to the footway and carriage way and parking bay suspensions. Having completed the first stage, we have now revised the works programme. We will carry out the next two stages at the same

time to complete the works earlier and shorten the duration of the impact on residents. The revised works programme and traffic impacts is marked on the map below.

For further details please refer to the original notice [Upcoming works in the Camden Cutting area](#)
