Adelaide Road, Camden NW3 - road closure 25 October-12 November

Dear Residents

Thames Water's contractors, Agility Alliance (Murphy Limited) will be carrying out some essential water supply pipe construction work in order to supply a water connection to the new HS2 building, to be built adjacent to the railway lines near to Adelaide Road, Camden NW3.

This will require a section of Adelaide Road to be fully closed from Monday 25 October until Friday 12 November 2021. We apologise to you all for the inconvenience that this will cause.

Adelaide Road will be fully closed between (not including) the turning into Eton Road and No.95/the Medical Centre on the other side of Adelaide Road. Access to Eton Road will remain in place but will be restricted, with right turn into and left turn out of Eton Road only.

A fact sheet is attached on the other side of this letter which provides more details.

No further bus diversions are required as the existing diversions will remain in place. Footpaths will not be affected and access to the Medical Centre will not be affected. Emergency services will be fully aware.

While the road is closed, Thames Water's contractors McAllister Limited will be carrying out some urgent work on the sewer access and connecting underground gallery in this area, both of which will be decommissioned. This work will be within the fenced off road closure area. The construction team will require two concrete lorries for a maximum of one hour only. Their work will be completed within ten days.

If you have any queries during this road closure period, please telephone Thames Water on 0800 316 9800 at any time and quote the Bulletin Board number 70034409.

Thank you for your understanding while this necessary work is completed.

Yours sincerely
