# Victoria Road: Next phase of Tunnel Boring Machine power supply

High Speed Two (HS2) is the new high speed railway for Britain. We are continually reviewing the works on our construction sites in line with Government and Public Health England (PHE) advice on dealing with COVID-19. The Government's current strategy makes it clear that construction activity can continue as long as it complies with this guidance. Please be assured that only sites that can operate within the guidelines are operational. All sites will remain under constant review.

## Tunnel Boring Machine power supply works

In July of last year, we wrote to you outlining our phased programme of works for the tunnel boring machine power supply along Victoria Road. The power supply works which started at Atlas Road roundabout junction with Victoria Road and progressed southbound along Victoria Road will now resume its final phases ahead of its completion date of Spring 2022.

## Victoria Road (Near Vehicle Holding Area) 26 April – 27 April (8pm – 6am)

CSJV will continue with the power supply works along Victoria Road in the southbound and northbound carriageway. These works will be carried out on the evening of 26<sup>th</sup> April 2022. During this period, an Anti-skid surface will be added to the existing road surface. The works will be conducted in two phases, as shown below in the traffic management diagrams. Two-way traffic lights will be in place to maintain traffic flow along Victoria Road. During these works, bus stops will be suspended northbound and southbound as shown in the below traffic management plans. Where possible we will relocate suspended bus stops to a new temporary location close by, however it is not always possible due to the distance between stops and other highway restrictions.

Utility supplies and other services will not be affected by these works.

**If you have a question about HS2 or our works, please contact our HS2 Helpdesk team on 08081 434 434 or email [hs2enquiries@hs2.org.uk](mailto:hs2enquiries@hs2.org.uk)**
