

09 August 2022

Dear Customer

Power cable duct installation work

We run the electricity network delivering power in London, the Southeast and East of England, and connect and move power cables.

On behalf of HS2, we are in process of installing a new connection to the electricity network in the Camden area to reinforce our network. The work will involve digging a trench to install ducts that will then carry our power cable. This work should not have any impact on your electricity supply.

We are progressing through the next sections of our works in a sequenced approach and will affect areas in Drummond Street, Euston Street, North Gower Street, Cobourg Street and Starcross Street. Works are due to commence on Monday 26th September and be completed early December 2022. We will be working between 8am and 6pm, Monday to Friday. Traffic management will remain in place for the duration of our works. Please note that the cable ducts will be installed in sections and the works will be completed in each area within a smaller time frame than detailed above. The three month period makes allowance to complete all works.

Should you have any mobility issues or specific access needs, or you would like any more information please do not hesitate to contact our customer care team on **0800 028 4587** or care@ukpowernetworks.co.uk.

You can find out more about the work we are carrying out at <https://www.hs2.org.uk/in-your-area/local-community-webpages/hs2-in-camden/>.

Yours Sincerely

Dawood Ghani
