Has the Stage 2 Survey been completed with retention and protection measures logged on the Register	X			

Have all practicable means to negate need for works to tree been investigated? Please provide details

Bridge jacking is required to mitigate ground movements during tunnelling. The movement joint need to be located along the interface between the road and the bridge deck, the tree is located directly above this interface line. It is not possible to survey and created the joint without removing the tree.

Trees Affected and Scope of Works: One self-seeded sycamore tree within the Park Village East Planter, adjacent to Monington Street Bridge as well as low level vegetation (mixed broadleaf).

Tree ID	Species
T001	Sycamore (<i>Acer pseudoplatanus</i>)
