Dear Resident,

Tree re-planting in Ickenham

Following our works to divert the Ruislip Branch Trunk sewer in your area, we planted several tree saplings as part of our reinstatement plan. Some of these saplings have since died, and we are sorry for the affect this has had on the area.

We want to ensure the area is returned to a high standard, and will continue to work closely with the London Borough of Hillingdon on how best to do this. We will be replanting more grass seed (to infill the bare patches where the seed has not taken) and replacing the tree saplings that have died.

Barhale will be back to plant the new trees in October / November this year. You can expect to see two operatives over a couple of days planting the trees. There will be no noise impact to the area whilst we are doing this.

Barhale will continue to maintain the area for the next 12 months, and then Thames Water will take over the maintenance activities for the next two years. Following this three year time period, the area will then be monitored by the London Borough of Hillingdon.

Kind regards

David Gable
