Have all practicable means to negate need for works to tree been investigated? Please provide details	This work is required in order to mitigate the risk of the tree roots escaping their allotted positions within the planter and subsequently causing damage to the PVE parapet wall, which would present a significant safety risk to the railway cutting below. The cyclical pruning of the trees will ultimately prolong the life of the trees as it will ensure they are appropriately sized for the planter.			

Trees Affected and Scope of Works: Two trees located within the PVE planter.

Tree ID	Species
T002	Sycamore (Acer pseudoplatanus)
T003	Sycamore (Acer pseudoplatanus)
