

Railway improvement work in your area

Community Relations
1st Floor,
One Eversholt Street
London NW1 2DN

Dear Neighbour,

Upcoming work in your area

What's happening?

We're upgrading the railway in your area to support the construction of High Speed Two (HS2) — Britain's new high-speed railway. In this letter, you will find details of where we will be working over the next few months.

Our works will continue throughout October, November and December, including some night-time and weekend working. We will also be carrying out works over the Christmas period, between 24 and 31 December, when some activities will take place 24 hours a day. Further details of the locations, dates and times of these works are provided in the table.

Work to connect the Great Western Main Line with a new Old Oak Common station

Network Rail is working in partnership with HS2 to prepare the existing railway for the construction of HS2. This involves realigning sections of track, overhead wires, signalling and other vital rail systems to connect the Great Western Main Line railway to a new station being built by HS2 at Old Oak Common. Our work to prepare and move parts of the railway for HS2 will continue over several years.

When and where are we working?

On the reverse of this letter, you'll find a map showing where we will be working, along with the dates and times of each activity. Our teams will move along different sections of the railway, so work will not take place outside any one property continuously. Because some work must be carried out at night, we will need to use lighting and floodlights.

All staff/contractors are regularly briefed to be aware that this is a residential area & to keep noise to a minimum where possible.

Electrification: What do we mean by piling, masts and overhead wires?

If you'd like to learn more about electrification - including piling, masts and overhead wires - please scan the QR code or visit <https://bit.ly/rail-electrification>.

We're sorry if our work disturbs you. It may be noisy at times, and we may occasionally use bright light, but we will make every effort to keep disruption to a minimum.

If you have any queries about the work, please telephone our 24-hour national helpline on 03457 11 41 41 or email NRHS2@networkrail.co.uk. Please use the reference at the start of this letter.

If you have any questions about the HS2 project or HS2 construction work, please contact the HS2 helpdesk on 08081 434 434 or email HS2enquiries@hs2.org.uk

Yours sincerely

Myall
